Juice Reimagined

**...Scanomat was founded and started from a simple garage.**

The company matured as the years passed, and so did the ideas. In 1981 Kim Vibe Petersen, CEO of Scanomat, designed the world's first fully automatic cappuccino machine. Since then, Scanomat has been known for its innovative, high quality solutions. Today, its flagship product - the TopBrewer - is changing the coffee, juice and drink experience and is taking us upon a journey around the world.

# CREATE YOUR JUICE & PAY

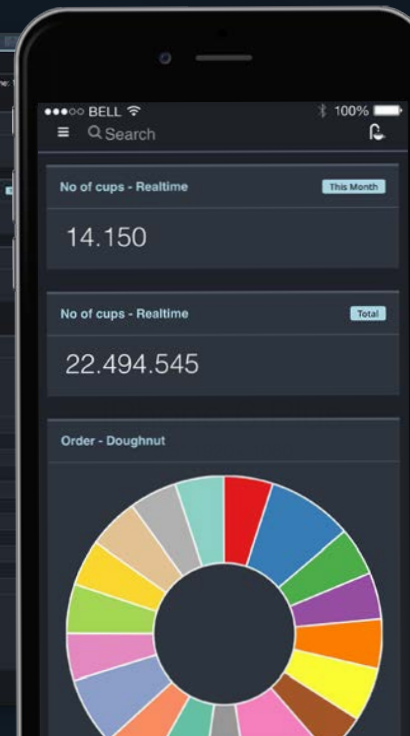

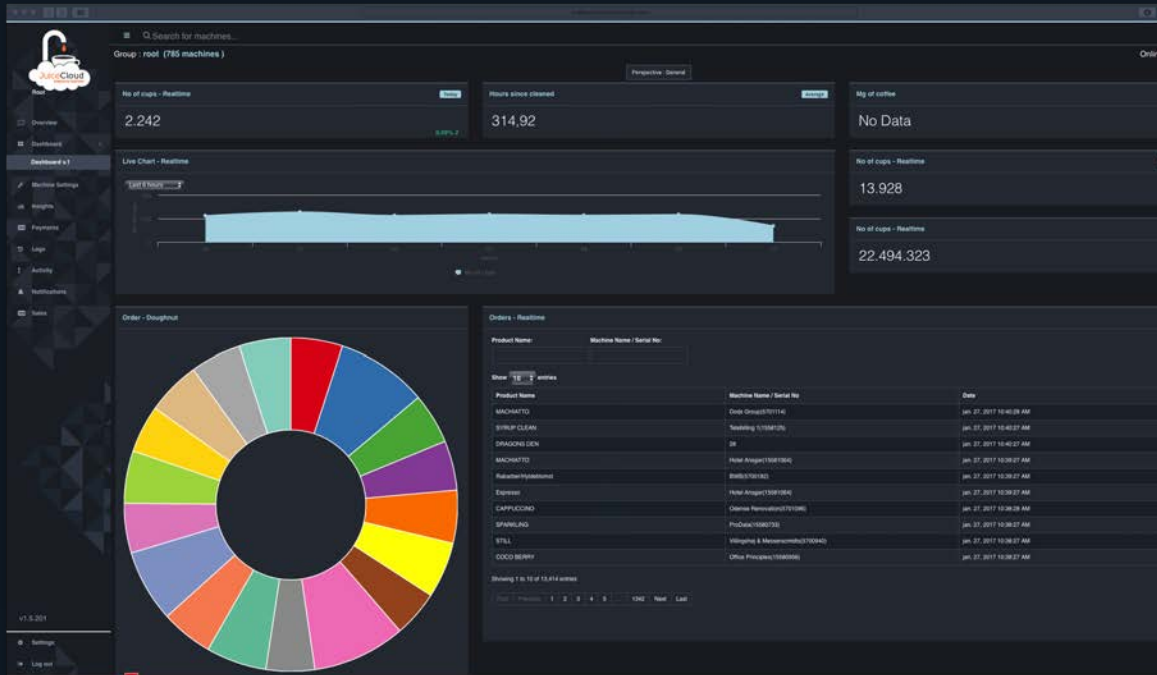

# Internet of Juice is here

JuiceCloud is the world's first real and most advanced cloud management system for juice machines - with state-of-the-art realtime data for your organization. Available as an App for all platforms, JuiceCloud gives you access to key data metrics and diagnostics at a glimpse on the dashboard, allowing you to work smarter and faster throughout the organization. JuiceCloud has multiple userlevels, allowing for versatile management. With cross-device compatibility you can access JuiceCloud on smartphone, tablet or PC, for real time insights at your fingertips. Simple tasks like refilling the machine, are now simplified to a notification directly on the person's smart device. CoffeeCloud will change how you run your business, and it will change the entire landscape of coffee machine operation.

## Coffee machine operation reimaged.

# Built for Architecture.

## Be prepared

With our pre-installation guides you can prepare any space easily for the TopJuicer and TopJuicer NFC. These guides include cutout, electrical, plumbing and ventilation requirements.

## Designed for Architects

The TopJuicer will fit uniquely into any space. Your imagination is the only limitation. It can easily stand alone or be integrated into existing furniture or even be a part of an environment. With minimum space usage we pride ourselves in making a juice unit that unobtrusively fits into any beautifully designed environment

## Do you know...

95% of the TopJuicer is hidden beneath the countertop or behind the wall and its graceful swan neck can both swivel and elevate. This allows the machine to adapt to even the most minimal designs.
